WORK PERFORMED / RESOLUTION	
1	1. The first step in the process is to identify the problem or issue that needs to be resolved. This involves gathering information and understanding the context of the situation.
2	2. Once the problem is identified, the next step is to analyze the situation and determine the root cause of the problem. This may involve conducting a thorough investigation or consulting with experts.
3	3. After the root cause has been identified, the next step is to develop a plan of action to resolve the problem. This plan should be realistic and achievable, and it should take into account all relevant factors.
4	4. The final step in the process is to implement the plan and monitor the progress of the resolution. This may involve regular communication and reporting to ensure that the problem is being resolved effectively.
